Ocean's secrets

Did you know that **oceans cover over 71% of the Earth's surface?**

There are **five oceans** covering the surface of our globe. the Pacific the Atlantic the Indian the Arctic and the Southern Ocean.

The Pacific Ocean is the **biggest ocean** of the world and covers more than 30% of the Earth's surface.

The name 'Pacific' come from the Latin word 'pacificus' which means peaceful. Thus, Pacific Ocean means 'peaceful ocean'. However, the Pacific is not really calm and peaceful. The 'ring of fire' is located in the Pacific Ocean. There is a string of volcanoes in the Pacific basin which are still active and therefore many of the world's major earthquakes and volcanic eruptions happen in this region. **The lowest known point on earth is called**

Challenger Deep. It is located in the Pacific Ocean near Guam in the Philippine Sea at the end of the Mariana Trench. The depth recorded is 10,920 m or 35,827 feet.

The largest coral reef in the world is located off the Australian coast and is called the Great Barrier Reef.

The Atlantic is the second biggest ocean in the world and is between the continents of America and Europe and Africa. The Atlantic Ocean is about **half the size of the Pacific Ocean** and covers roughly 20% of the Earth's surface. However it is growing in size as it is spreading along the Mid-Atlantic Coasts.

The Arctic Ocean is located around the North Pole across the Arctic circle. There are many **polar bears** living on the Arctic ice. The Southern Ocean is located around the South Pole across the Antarctic circle in the Southern Hemisphere off Antarctica. The Southern Ocean is the home of **Emperor Penguins and Wandering Albatrosses.**
